

From Image to Information.

CONNECTED NUTRIENT MANAGEMENT

The easy to use nutrient management system for the precise, site-specific application of organic or mineral fertilizers (Nitrogen and Phosphate) connects expertise and technologies of all innovation partners and enables legislation-compliant nutrient management. The joint development has been awarded a Gold Medal as AGRITECHNICA Innovation 2015.

VISTA GmbH as an **innovative value adding** company in the field of remote sensing has over the last 20 years worked on translating state-of-the-art scientific methods into **operational services**. The fields of **services and applications** cover hydrology, agriculture and environment. Our vision is to combine **optical and radar satellite images** of different resolutions as well as additional geospatial information in a scientifically sound way to provide services both on the **local as well as the global scale**. Through collaborations in international science and technology projects, dedicated partnerships, and **close customer relations**, VISTA ensures that it can offer the **best possible solution** for requested information to users and customers.
